General Notes:

A	<p>Conrail was formed April 1, 1976, essentially by merger of the Central New Jersey, Erie Lackawanna, Indianapolis Union, Lehigh & Hudson River, Lehigh Valley, Pennsylvania Reading Shore Line, Raritan River and Reading into Penn Central, with those roads' power being renumbered into PC's scheme. The CR numbers listed for former DL&W and LV units are confirmed as having been applied; as for the rest of the inherited first-generation power, many units were retired without being renumbered or operated by CR. The intent of this roster is to show only what was actual renumbered or rostered by CR. Units retired without being renumbered or rostered will be listed in the former owners' rosters. Builder number data for inherited units is from those rosters.</p>
B	<p>Renumbering discrepancies:</p> <ul style="list-style-type: none"> ⤴ Source 1 lists three PC locomotives as having been conveyed to CR that no other sources show as having been on the PC roster: F7A 1844; S-2 electric 4710; GP7s 5686, 5757, 5763, 5850, 5862, 5864 and 5883. ⤴ NYC had retired 1844 and 110 before renumbering to 4710, and renumbered 5686 to 5620 2nd. PC renumbered 5757, 5763, 5850, 5862 and 5864 to 5752, 5670, 5884, 5886 and 5888 (all 2nd), all of which were conveyed under those numbers. 5883 never existed in the renumbering scheme from PRR to PC. ⤴ PC 5795 and 5903 are shown as being conveyed. 5903 would have been r# 5765 if its steam generator had been removed; or was 5765 renumbered from another unit? The same occurs with 7345 and 7517. ⤴ 5787 is also shown as conveyed to CR, but no other sources mention it as retired or conveyed to PC. ⤴ The list of units not conveyed includes GP9 7071. This is very likely a typo, as PRR 7072 was not conveyed to PC. ⤴ 8499's disposition is unaccounted for. Not listed as retired in Source 3, not listed as conveyed to PC in Source 6, but conveyed to CR per Source 13.
C	<p>Capital programs from predecessor roads:</p> <p><u>Lehigh Valley:</u></p> <p>From 10/53 through 06/60, LV and EMD conducted a unit-by-unit program to build SW8s and, later, SW900s from traded SWs and NW1s, using the same numbers. Very few components were reused, so the SW900s can be considered new rather than rebuilt. A few electrical components from SWs 106, 107 and 110 were reused, so those SW900s were rated 660 hp. Other than that, the new units were identical to stock SW8s and SW900s. Those built before early 1957 used the original build number, and then EMD began issuing new numbers for such projects.</p> <p><u>Reading:</u></p> <p>Reading conducted three capital programs for its switchers.</p> <p>First, SWs 10-15 were rebuilt to 660 hp SW900ms 04,07,01,05,08,06/1956 respectively, reclassified OE-13 and not renumbered. 11 was "recently" reclassified to 900 hp as of mid 1970.</p>

Then, VO1000s 55-59,71,73-75,78,80,81,88,89 were repowered by EMD to SW1200 specs but derated to 1,000 hp, renumbered and retaining the cabs, trucks, frames and Baldwin build numbers:

- ^ 55 to 2706, 02/1959
- ^ 56 to 2708, 03/1959
- ^ 57 to 2711, 04/1959
- ^ 58 to 2710, 04/1959
- ^ 59 to 2709, 04/1959
- ^ 71 to 2712, 04/1959
- ^ 73 to 2704, 02/1959
- ^ 74 to 2703, 02/1959
- ^ 75 to 2705, 02/1959
- ^ 78 to 2707, 03/1959
- ^ 80 to 2702, 05/1959
- ^ 81 to 2701, 05/1959
- ^ 88 to 2713, 04/1959
- ^ 89 to 2714, 03/1959

VO660s 61-70 were repowered by EMD as 900hp SW900ms 1501-1510 (not in sequence) in 1961¹. However, EMD assigned new build numbers and reused only the trucks, so for purposes of this roster they are considered trade-ins.

In a final program, SW900ms 10-15 were slated as of mid 1970 to be upgraded to 900 hp with parts from SW1s 16-21 and r# 1516-1521 to follow the stock SW900s¹. The work was done 1970-1971³, with the units retaining their original build numbers and being renumbered in order⁴.

Penn Central:

Starting in early 1969 per Source 5, PC undertook a capital rebuild program for NW2s, SW7s and SW9s, plus SW900 8631. All were rated at 1200 hp, and 9150-9177 are known to have been completed by or in process as of mid 1969. 8704 and 8754 were also rebuilt during this time and renumbered to take the places of 9133 and 9075^{1st}, which had already been rebuilt (Source 5 has 8704 r# 9133 2nd and then 9153 2nd; Source 3 has them being renumbered directly from their NYC numbers.) Numerous other units were also rebuilt in this time but not renumbered per Source 3; Source 5 cites only a couple of these units. Source 5 erroneously lists an unidentified unit plus 8654, 8696 and 8673 as being rebuilt to 9099-9103 (four units versus five) and also has unidentified NW2s being rebuilt to 9099 and 9104-9111, 9178 and 9179. Source 17, the only other listing of these rebuilds in X2200S issues available to me other than the 1969 issues containing the rosters, has 8654/96/76/73/67 being rebuilt to 9100-9104 in 1971. (That same source comments that the 1200 hp rating was probably unrealistic since the original generator was used, and it was likely good for 1100 hp at the most.)

Source 5 also calls *all* the rebuilds in this program NW2us regardless of original model. This roster cites the original model. In an odd coincidence, NW2 8657, nee- PRR 9157, got its old number back in the program. Additionally, IHB NW2s 8733/35-37/91/93 and 8820 were presumably transferred to PC, perhaps when rebuilt.

Source 14 says that CR called them all NW2MODs.

Along with all this, SW7s 8843,8887,8900/14/15/30, 9045/49/68/78/81/98 and SW9s 8944/46//69/72/78/79/84, 9126-9129 and 9131 were also rebuilt as part of the program within the same time frame but were not renumbered.

PC undertook a capital program for its RS3s. The first unit to be done, 5477, received a 12-567 engine (at what rating?) and other components from a retired E8A, and its short hood was completely removed. It was not renumbered, and it was released from Altoona 04/07/1972.

	<p>The second unit, 5230, received the same treatment at Altoona but with a chopped nose, and was released 07/16/1973.</p> <p>5230 and 5477 were considered successful, and the campaign was transferred to the Dewitt, New York, shops. 5240 was rebuilt there in the same fashion as the first official "Dewitt Geep." 5240 was released 08/1973, and 5242 09/17/1973. All four were renumbered into the 9950 series in December 1973, and the program began in earnest the next month, lasting into Conrail.</p> <p>The Source 11 summary has 5567 becoming 9963 1st and 5257 9963 2nd, with no explanation of what happened to 9963 1st. It also does not show four additional rebuildings that are in Source 1 – 5476, 5239, 5327 and 5362 to CR 9985-9988, so it is assumed that those were in process at the time of the CR merger and are listed as such. Source 1 also lists EL 1060 as going into the program at merger.</p>
--	---

Notes:

1	<p>F7 notes:</p> <ul style="list-style-type: none"> ⤴ 1878,1879,3478 and 3479 were among 10 F7s PC bought from the D&RGW 02/28/1970 for trade-in to EMD for GP38s 7815-7824, order no. 7202. 5712/21/33/54 were deemed to good to be traded and were put in service as PC 712/21/33/54. The other units, 5641/42/62/63/73/91, were traded as planned. 712/21/33/54 were r# 3478,1878,3479,1879. They were repainted for PC in late 1972.
2	<p>4678 is a class T3a. It was to go to Amtrak for wire train service ³.</p>
2	<p>NYC's S-1, S-2 and S-3 Class electrics were built as Class T-1/2/3 1-D-1 and reclassified when rebuilt to 2-D-2s; the S-1s and S-2s were rated at 792 hp, and the S-3s at 793. The S-1 was built as 6000, and r# 3400 in 1905 or 1906; the S-2s and S-3s were built as 3401-3446. See Note A for further renumberings. The rebuildings and reclassification may have taken place at the 1936 renumbering.</p>
3	<p>Conrail continued PC's "Dewitt Geep" repowering program for RS-3s, and many inherited RS-3s were sent directly to it without being renumbered into the 5200-5500 series first. The majority of former DL&W RS-3s, EL's 905-917, are accounted for as having gone directly to the program.</p>
4	<p>GP7 notes:</p> <ul style="list-style-type: none"> ⤴ CNJ 1526, 1528 and 1531 swapped numbers in 1959, with 1526 r# 1531 2nd, 1528 r# 1526 2nd, and 1531 r# 1528 2nd. One source only has 1526 and 1528 exchanging numbers. ⤴ CNJ 1532 b/n 17110, was rebuilt to a GP9m, b/n 25448 08/1959. <p>Conrail launched a capital rebuild program for GP7s, and some inherited units (EL 1278 and 1407 confirmed) were routed to it instead of receiving their assigned numbers.</p>
5	<p>In 01/1975, Dewitt Shops built an experimental hump slug set from RSD-15 6811 and RSD5 6803 2nd. 6811 was repowered with a 12-567 EMD engine, and 6803 was converted to the slug and its radiator areas was removed and replaced with the short hood of RS-1 9901. They were renumbered 9949 and 9948 respectively, and then 9948 was also renumbered 9949. (One source lists them as 9949A and B respectively.) RSD-15 6815 and RSD-5 6801 were to become hump set 9948, but the program was cancelled with the advent of Conrail.</p>
6	<p>SD38 notes:</p> <ul style="list-style-type: none"> ⤴ Source 11 lists b/n 36406-36438 for 6925-6959. Two builder numbers are missing.
7	<p>RS11 notes:</p> <ul style="list-style-type: none"> ⤴ 7640-7644 and 7648 were upgraded to 2000 hp and had been on lease to LV since 03/64. They were renumbered 01/67 in keeping with the PC

	renumbering, and so were the only LV units not renumbered for the CR merger.
8	GP38 notes: <ul style="list-style-type: none"> ⤴ Source 11 omits b/ns for 7800-7814; they are 35429-35443 per Source 4. Source 4 speculated that b/ns for the group 7675-7824 might be split into two blocks; this did not happen per Source 11.
9	SW1 notes: <ul style="list-style-type: none"> ⤴ Source 11 states that SW1 PC 8415 was r# 8403 2nd; however, there was no 8415, even in the Source 11 summary. The b/n given is for the only PC 8403 known to exist.
10	SW1500 notes: <ul style="list-style-type: none"> ⤴ IU 22,23,25,27-29 are nee EMD plant switchers (not demonstrators) 106-108,110,112,111 (12,11,11/67; 01/69; 5,12/71). ⤴ See IU roster for information on b/d for IU 22 and 23. ⤴ IU 23 was r# 200 and repainted for the American Bicentennial, and wore that livery into the CR merger.
